

LET THE BEAT BUILD

MUSIC PERFORMANCES

Students participate in songwriting, vocal development, and live performance coaching. They build stage presence and confidence through rehearsals and showcases that allow them to share original music with peers and the community.

Programs culminate with participants highlighting their growth and creativity.

MUSIC WORKSHOPS

Let The Beat Build teaches youth ages 5–19 the fundamentals of digital music production using professional tools like MIDI keyboards, digital audio workstations, and sound libraries.

Participants learn beat-making, song structure, sound design, and mixing through hands-on activities that build both technical skills and artistic expression. Curriculum includes role-play as artists and producers, industry insights, and collaborative challenges to promote teamwork and creativity.

SENIOR PROGRAMMING

Through rhythm-based workshops and guided music engagement, LTBB offers programming tailored for seniors that supports memory, emotional well-being, and intergenerational connection. Sessions encourage participants to share personal stories through sound and experience music in ways that foster joy and belonging.

CULTURAL PROGRAMMING

All LTBB programs integrate emotional intelligence and mental health practices. Through life coaching exercises,

group check-ins, and music-fueled self-reflection, students learn to regulate emotions, build resilience, and strengthen identity. These components are culturally grounded and youth-centered, enhancing the impact of each creative session.

Participants and audiences aged 6 and older
